Re Item V

Reasoned statement with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

- 1) The closest prior art is constituted by D1 = US-A-3 074 103. From D1 a method of scalding slaughtered poultry is known wherein the scalding chamber (cf. Fig. 1, vertical path of conveyor along steam pipes and nozzles 36, 37) has a "relatively large height" (cf. Point 5 below) and extends through two or more levels/storeys (the path extends through three levels of the picking chamber). Consequently, the subject-matter of claim 1 is not novel (Article 33.2 PCT).
- 2) The apparatus of present independent claim 4 is considered to be rendered obvious by the disclosure of D1 and the general knowledge of the person skilled in the art. The characterising features of claim 4 pertaining to the "large height" and the conveyor extending through three levels/storeys (of the picking chamber) are known from D1 and the features of the pre-characterising part are considered general knowledge of the person skilled in the art (Article 33.3 PCT).
- 3) A positive statement with regard to novelty and inventive step of the subject-matter of dependent claims 2, 3 and 5-8 cannot be given inasmuch as these claims depend on not-novel and not-inventive independent claims (Article 33 PCT).
- 4) The subject-matter of the present international application is considered industrially applicable (Article 33.4 PCT).

Further Comment:

- 5) The use of the term "large height" renders the claims ambiguous and thus unclear, contrary to Article 6 PCT.
